

EXIDA USER CONFERENCE 2026

*20 Years of Assurance by Design: Functional Safety, Cybersecurity
& Alarm Management for Resilient Operations*

exida User Conference returns this year with a special milestone celebration of **exida Asia Pacific Pte. Ltd.'s 20th Anniversary.**

Over the past two decades, we have grown alongside with the industries we serve, supporting our customers with high-impact, cost-effective solutions for their Functional Safety, Cybersecurity and Alarm Management challenges in Asia Pacific. This conference provides a valuable opportunity to network, share insights, exchange practical real-world experiences with exida experts and peers from across the different industries.

Don't miss this milestone event – Join us in celebrating 20 years of collaboration, innovation and industry leadership!

Conference Information

Objectives:

- To share **practical global industry experience** in Functional Safety, Cybersecurity and Alarm Management.
- To **demonstrate proven best practices** for implementing and sustaining Functional Safety and Cybersecurity lifecycle activities
- To **showcase new features, recent enhancements, and future roadmap** of exida software solutions
- To strengthen **collaboration and knowledge exchange** between exida experts, industry-minded professionals and our customers.

Format:

- 2 days in person
 - Location: [Pan Pacific Singapore](#)
 - Dates: 17-18 September 2025
 - Language: English
-

Conference Topics

Theme: “20 Years of Assurance by Design: Functional Safety, Cybersecurity & Alarm Management for Resilient Operations.”

Topics (**subject to changes*):

1. Functional Safety (FS)

- An Integrated Approach to Overall Process Safety
- Using SILstat to determine if your SIS Performance Assumptions are Realistic
- Closing the Operations and Maintenance Risk Control Loop Gap
- Human Factors & Safety Culture in LNG Operations
- Demystifying FSA
- **Case study sharing sessions by end users/EPC/SI/OEMs*

2. OT/ICS Cybersecurity

- **Integrating Safety & Cybersecurity in Operations*
- Insights on SIL Certificates and IACS Cybersecurity Certificates
- From Code to Confidence: How the Software in SIS Achieves Functional Safety & Cybersecurity Compliance
- **Case study sharing sessions by end users/EPC/SI/OEMs*

3. Alarm Management

- **Linking Alarm Management with Process Safety and Safety Cases*
- **Managing Change in Alarm Systems (MOC Perspective)*

4. Cross-Discipline Integrations

- How does Cybersecurity impact Functional Safety?
- **From SIL to SOC: Integrating FS, Cyber & Alarms Across the Lifecycle*
- **Alarm Management Considerations under IEC 62443*

5. Special Topics

- exida’s CEO speech
 - **Cybersecurity Best Practices*
-

Conference Speakers

		
Iwan van Beurden	Dr. Steve Gandy	Patrick O'Brien
MSc, CFSE	CFSP, DPE, MBA, DipM	CFSP, CACS
CTO, Director of Product and Service Development	VP of Global Business Development	Assistant Director of Engineering
		
Greg Chantler	Dr. Sudhir Pai	Dr. Eric Scharpf
MIET CENG, CFSE, CACE	CFSE, CACS	CFSE, IntPE(NZ)
Managing Director of exida Middle East	Country Head India	Principal Partner
		
Sam Holden	Desmond Lee	Jack Gao
CEng, RPEng (Elec), RPEQ, RPEV, CFSE	CFSE	CFSE, CACE, ASPICE Assessor
Operations Manager / Principal Safety Engineer	Managing Director of exida Asia Pacific	Director of exida Asia Pacific

Chung Hong Hong

CFSE, CACE, CISSP, CISM

Senior Consultant of exida Asia
Pacific

**Speakers subject to changes*

Conference Guest Speakers

		
Guest Speaker Name	Guest Speaker Name	Guest Speaker Name
Speaker credentials	Speaker credentials	Speaker credentials
TechnipFMC	Speaker designation/company	Speaker designation/company
		
Guest Speaker Name	Guest Speaker Name	Guest Speaker Name

Pre-Conference Courses

ALM 102: Fundamentals of Alarm Management for the Practitioner: How to Apply ISA-18.2 / IEC 62682

15 - 16 September 2026

Effective alarm management is a pre-requisite for process plants that want to be successful in today's global marketplace. It impacts the bottom line by minimizing unplanned downtime, reducing insurance premiums, preventing process safety incidents, and enabling operational excellence. To deliver these benefits to the bottom line requires personnel who have been trained on industry best practices and how to apply the ISA-18.2 / IEC 62682 alarm management standards. This course is designed to help personnel develop the skills and knowledge to drive effective alarm management practices within an organization.

CS 203: IEC 62443 Cybersecurity for Industrial Automation Control Systems (IACS) for Employees & Contractors

15 - 16 September 2026

This course addresses the quality and understanding employees and contractors need to have on the topic of Cybersecurity for the IACS space. The access granted to IACS networks is often the same for employees and contractors. The seriousness of access must be established with a joint work process similar to a Job Safety Assessment. The Job Cyber Assessment is a work process to protect both client and contractor from inadvertent impact on the given IACS cyber protective system. The ability to access the client's network without an impact on the IACS cyber protective systems whilst leveraging the tools on site requires a clear understanding of the following.

FSE 103: CFSE / CFSP Process Exam Preparation

16 September 2026

This course is targeted for anyone who plans on taking the CFSE/CFSP process exam. It will be a refresher course on the key concepts of IEC 61511 with sample exercises. Participants will need to make sure they have a copy of the IEC61511 and the relevant sections of IEC 61508 standards.

FSE 107: Functional Safety For Managers – Overview Course

16 September 2026

The objective of this course is to provide an overview of functional safety to help managers/supervisors with responsibility for oversight of Safety Instrumented Systems and/or Safety. gain an understanding of functional and/or process safety requirements. Process safety is driven by corporate culture, where a poor corporate safety culture is often not aligned with functional safety requirements. A good corporate safety culture better aligns with functional safety requirements, such as encouraging openness, fostering a learning culture and implementing functional safety management, all of which have a direct bearing on process safety.

**Trainings subject to changes*

Conference Registration

*Registration Fees

Early Bird Package – Limited time only!

- **Conference only:** USD 500 per attendee
- **Conference + FSE 103 / FSE 109:** USD 1,500 per attendee
- **Conference + ALM 102 / CS 203:** USD 2,400 per attendee

 16 March 2026 - 19 April 2026

Group Registration Package

- **Conference only:** USD 660 per attendee
- **Conference + FSE 103 / FSE 109:** USD 1,660 per attendee
- **Conference + ALM 102 / CS 203:** USD 2,560 per attendee

 16 March 2026 to 31 August 2026

Eligibility:

- Minimum 3 attendees from the same organization

Standard Package

- **Conference only:** USD 700 per attendee
- **Conference + FSE 103 / FSE 109:** USD 1,700 per attendee
- **Conference + ALM 102 / CS 203:** USD 2,600 per attendee

 20 April 2026 to 31 August 2026

What's Included in Your Package?

Gain valuable insights not only from the stage, but also through direct interactions with exida experts and subject-matter specialists throughout the conference.

- Full access to all sessions across for both days
- Meet the experts access – Connect, engage and learn from our speakers
- Conference materials + Certificate of participation
- 2 networking lunches + coffee breaks
- Cocktail reception networking
- Lucky draw participation
- Be part of the special milestone celebration of exida Asia Pacific Pte. Ltd.'s 20th Anniversary
